12 lb	2.58	0.031	0.009

DESIGN INTENT:

The EquinoX Solid marks the return of the unmatched Solarion A.I. Core, now paired with the next evolution of Storm's Adhesion System Technology — A2S. This advanced coverstock pushes the limits of oil absorption in the Storm lineup, delivering fierce midlane traction and explosive backend response. What sets A2S apart is its ability to generate sharp, angular motion, a rare trait for a textured solid, making the EquinoX Solid uniquely dynamic. At the heart of it all, the revolutionary tri-cylindrical Solarion Core delivers a strong, decisive motion at the breakpoint without sacrificing the consistency players demand. If you're chasing total hook, the EquinoX Solid will stand toe-to-toe with the Ion Max, but with a dramatically different shape and motion. It's bold, aggressive, and built to stand out.
