## DESIGN INTENT:

The Ion Pro Pearl expands the highly acclaimed Ion Pro Series with its most balanced motion to date. Featuring the latest iteration of the NRG Pearl Cover, this release makes an immediate and needed impact in the Storm lineup by keeping the core and cover in equilibrium. Finished at 4000-grit Abralon, this is the smoothest surface we can create without the use of polishes or compounds. Meticulously engineered for medium length and an assertive backend without sacrificing control, it excels when the bigger balls begin to become too aggressive. The driving force of the Ion Pro Pearl is the proven Element Tour A.I. Core. Its low RG and medium differential help the ball stay on-line while preserving optimal energy for a dynamic finish downlane. This medium-strength asymmetric core continues to stand out as one of the most versatile designs Storm has to offer. Extremely receptive to speed/hand position variations, this ball shines on a wide variety of medium conditions and gives you the confidence to open up your angles when the lane demands it.
