## **DESIGN INTENT:**

The Level is the debut of the Lab Series, a line designed to redefine performance through innovation. The Solid RPM (Regenerative Polymer Matrix) cover is a revolutionary material that introduces never before seen physical properties in the industry. Unlike traditional covers that degrade over time, RPM preserves its surface integrity ensuring a predictable reaction on every shot. The Equalizer A.I. Core features a lighter density in order to increase the RG so the core will take longer to respond to friction. The cuts toward the middle of the shape increase overall differential without the need for a higher density flip block at the bottom of the core.
