DESIGN INTENT:

The Velocity legacy meets A.I. engineering in what could be one of the most thrilling mashups ever. The Velocity weightblock was already a force to be reckoned with. It's low RG/high differential symmetric combination already set it apart from the competition. Adding in A.I. technology further diversifies the core by enhancing ball dynamics and improving pin carry. The TX-16 cover is the secret sauce to the Phaze II's storied success. The pearl form of it is even more dynamic, especially on the backend. The Phaze A.I. creates the most dominant entry angle of any shiny Phaze thus far. Fortified with Power Edge, the Phaze A.I. will be sure to deliver maximum results once the bowling balls with more surface texture begin to bog down in the front part of the lane.
