DESIGN INTENT:

The Pitch Black represents a glimpse into the past that showcases a super-high quality conventional urethane. With proven design principles for both the cover and the weightblock, the Pitch Black is sure to be the answer to demanding conditions. The Controll solid urethane cover takes predictability to a new level on less than optimal surfaces and shorter oil patterns. The Capacitor Core helps regulate flare potential and provides a smooth transition off the end of the pattern. All styles will love the classic shape the Pitch Black gives across a wide variety of patterns and surfaces.
